## Profile

Senior full-stack developer building web applications across education, financial services and broadcast technology. Strong React and TypeScript experience, with hands-on work across APIs, data and cloud infrastructure. Takes features from concept through delivery, combining user-centred design with maintainable code, testing and pragmatic collaboration.

## Technical skills

**Frontend:** React, TypeScript, JavaScript, Next.js, Vite, Tailwind CSS, responsive and accessible UI

**Backend and data:** Node.js, Express.js, Scala, REST APIs, GraphQL, PostgreSQL, DynamoDB

**Cloud and delivery:** AWS (EC2, S3, CloudFront, Lambda, SQS, Kinesis), Vercel, Docker, CI/CD, Turborepo

**Engineering:** API integration, automated testing, code review, reusable components, team mentoring

## Experience

**Senior Software Engineer** Oct 2025 - Present
**NumberWorks'nWords**

- Develop the V3 education platform and Parent Portal using React and TypeScript, improving parent-facing progress notifications, homework submissions and centre-management workflows.
- Improved homework-analysis API integration and submission resilience, preserving accepted homework when other photo uploads fail.
- Currently developing assessment booking, time-zone handling, homework printing and game-planning tools across V3 and the Parent Portal.
- Review code for accessibility, state preservation and regression coverage; incorporate stakeholder and centre-manager feedback into product improvements.

**Senior Software Developer** Oct 2024 - Oct 2025
**Money Sweetspot** | Auckland, New Zealand

- Worked with a virtual CTO to maintain and improve a TypeScript stack using Next.js, React, Vite and Express.js, organised in a Turborepo and deployed to AWS.
- Led frontend improvements and a platform redesign supporting the shift from loan provider to financial wellbeing platform, with responsive interfaces and reusable components.
- Built and launched a customer wellness system for structured check-ins, goals, motivations and debt-relief plans.
- Created reporting tools and dashboards that helped staff communicate customer stories and inform strategic and technical decisions.

## Experience continued

**Senior Software Developer** Jul 2023 - Oct 2024

**AdviceLink** | Auckland, New Zealand

- Delivered review automation from concept to deployment, enabling mortgage and insurance advisers to schedule and generate client reviews.
- Built client and product tagging to improve organisation and searchability, owning the feature end to end.
- Maintained and extended a multi-tenant Scala and scalajs-react application, including mortgage and insurance review tools and support for company- and trust-held mortgages.

**Software Developer** May 2022 - Jul 2023

**Tella** | Auckland, New Zealand

- Designed and developed an online home-loan SaaS product and an SEO-focused company website using React and Next.js.
- Built responsive interfaces and reusable components, using Redux and Zustand for application state management.
- Migrated hosting and repositories from Azure to GitHub and Vercel, and developed a custom advert-delivery system for targeted campaigns.

**Software Developer** Nov 2021 - May 2022

**Foster Moore** | New Zealand

- Developed, configured and maintained government registry systems using Java Spring and internal UI tools.
- Built data-collection interfaces and worked across teams on delivery, testing, debugging and system improvements.

**Junior Software Developer and Broadcast Supervisor** Dec 2015 - Nov 2021

**Alston Elliot** | New Zealand

- Combined full-stack development with broadcast graphics supervision, building web applications using the MERN stack, Angular, Nest.js, Python and .NET.
- Created and maintained databases, supported legacy Java, C# and Delphi systems, and supervised client broadcast graphics.

**Operations Manager** Jul 2012 - Dec 2015

**KIDS graphics Ltd** | New Zealand

- Managed daily operations, equipment and team support; developed client graphics using proprietary software and Python, and trained broadcast staff.

## Education

**Diploma in Software Development, NZQA Level 6** | Jan 2019 - Jul 2022

Whitecliffe - Technology & Innovation
